

Starplex Through Bead Pharma Packers

Starplex's Through Bead Pharma Packers are designed with a bead going to the bottle shoulder, providing more cap support and top load resistance. The through bead also allows more processing controls, resulting in a better-quality extrusion blow molded bottle. This HDPE line is manufactured in our Toronto, Canada plant. Sizes range from 300cc to 1300cc, and most sizes offer both a 45/400 and 53/400 neck option.

Mold#	Capacity	Neck Finish	Weight	Height	Diameter	Case pack	Process
